ABOUT AGRATA

Agrata Resources Sdn., Bhd, a Limited company established in October 2010 having its operating office at Bandar Puteri Puchong, Selangor, Malaysia. We specialize in wildlife and livestock acquisition transportation, exchange program coordination as well as sourcing of veterinary equipment and animal products, animal semen or embryos for breeding or research purposes. We look into the conjoint matters such as animal transport services, veterinary services and animal insurance services. We are equipped with a team of highly skilled that takes care of all your queries at every step of the exchange.

Such animal exchange programs are beneficial and convenient for both the donor as well as receiver. This program also prevents the reckless and unnecessary capturing of animals from the wild, thus creating a win-win situation for all. Also we strictly follow the rule of transparency. Our activities adhere to the rules and regulations of CITES (Convention on International Trade in Endangered Species of Wild Fauna and Flora). We carry out exchange of only those species which are listed by CITES and which have appropriate documents. Hence you can be assured of hassle free procedures as we strive to unite the animals with homes that require them.

Our company involves in the following services:-

a) Animal Exchange Program

We specialize in setting up Animal Exchange Programs for clients worldwide. Through the process of exchange, the company helps to find homes for surplus animals bred in captivity in Zoos by locating suitable clients/Zoos that may have a shortage of the particular animal.

b) Animal Supply & Collection Management

Agrata Resources Sdn., Bhd is constantly updating its database of surplus and wanted animals that is provided by various zoos within our South East Asian region as well as from zoos around the world. We support our client zoological organizations in the planning of their animal collection and providing services on relocation of surplus animals and also management of their animal collection. Enclosed with this is our animal collection catalogue.

c) Professional Logistics/Wildlife Relocation Services

We have experience in the logistics / translocation of wildlife from around the globe in the past years. We arrange transport from the beginning to the final destination.

d) Livestock

Our future business involves the marketing of livestock such as goats, sheep cattle and etc. We have reasonable amount of sources that would bring supplier, distributor and customer together. Our contact would originate from Canada, US, Australia, Asia and other countries which produce hale and hearty livestock. We also looked at selling farm products, semen and embryos to complete your farming needs.

Our objective is creating strategic teams to serve the unique needs, goals, and objectives of our clients. We are proud to develop innovative solutions to complicated and demanding problem. Besides that, we are devoted to giving you great selection, first quality service and fair price."
